Now I would like to shift from talking about your child to talking about your family. I am going to read some statement describing feelings and thought some people have about their families. Family means all people related to you by blood or marriage and those who usually live with you whether or not they are related. Tell how often the statement is true about your family.

1 = NOT TRUE of your family; 2 = SOMETIMES TRUE of your family; <math>3 = OFTEN TRUE of your family; 4 = ALWAYS TRUE of your family
