---

Dear Colleagues and Students

The COVID-19 management committee would like to advise the Wits community that a medical student has been quarantined after it was found that the student came into contact with a person who had been identified with COVID-19.

The student is being monitored closely and has not displayed any symptoms of COVID-19. The student has been screened and the test results are expected later today. However, as a precautionary measure the Faculty has cancelled the clinical activities scheduled for the student's class today.

We will keep you updated as soon as we have any further information.

Thank you

**Wits COVID-19 Management Committee**
